

## MAKING FRIENDSHIP BRACELETS

### Materials:

- 7 pieces of yarn or wool approximately 50 cm long (optional: use different colours!)
- Cardboard (recycled material if possible)
- Circular object like a cup or a soup can
- Pencil
- Scissors

### Instructions:

1. Make the cardboard loom with which you will create your bracelet. Using your circular object, trace a circle onto the cardboard and carefully cut it out. (Ask an adult for help if you need it.)
2. Using your pencil, draw four intersecting lines so you have eight identical sections.
3. Poke a hole in the middle of the circle (as shown by the black dot). Don't make the hole too big, it should be smaller than the diameter of a pencil.

# VIRTUAL CAMP CAMP VIRTUEL

- Cut about a third of the way into each line from the edge of the circle (as shown by the red areas in the image).
- Gather your seven pieces of yarn/wool and tie them all together in a knot at one end.
- Push your strands through the hole on your cardboard loom so that the knot ends up on one side of the loom and the strands hang down on the other side.
- One strand at a time, push the strands through the slits you've made on your loom so they come out on the other side. It should look like a jellyfish with each strand like a tentacle hanging down from the loom. There should be one slit left unused.
- Hold your cardboard loom with the strands dangling down. Bringing your attention to the empty slit, take the third strand to the LEFT of the empty slit, lift it up and tuck it into the empty slit.
- Rotate your loom so you are now looking at the new empty slit and repeat this previous step by taking the third strand to the LEFT of the new empty slit and tucking it into the empty slit.
- Repeat until you have weaved enough yarn to fit your wrist! Be sure to pull your bracelet through the loom as you weave the yarn. Tie off the end when you're finished, leaving enough yarn to secure it on your wrist.
